OBJECTIVE

Detail-oriented **MERN Stack Developer** with a proven track record of successfully completing diverse projects. Proficient in a range of technologies, adept at problem-solving, and committed to delivering high-quality solutions. Strong collaborator with excellent communication skills.

TECHNICAL SKILLS

- Frontend: JavaScript, HTML, CSS, React.js, Material-UI
- Backend: Node.js, Express.js
- Database: MongoDB, Firebase
- Version Control: Git

PROJECTS

Stack Overflow Clone

- Created a user-friendly frontend with React.js.
- Established a robust backend using Node.js and Express.js.
- Managed data efficiently with MongoDB.
- Implemented secure email authentication using Nodemailer.
- Integrated a chatbot with OpenAI API and OTP verification.
- Enabled subscription plans via Stripe payment gateway.
- Designed a points and badges system based on user contributions.

Ecommerce

- Developed an eCommerce application using React.js with styled components for seamless styling.
- Integrated Firebase for robust database management and authentication features.
- Implemented functionality to search products by categories and prices, enabling users to increase quantity and dynamically calculate the total amount.

Chat App

- Created a private one-to-one chat application using React.js, incorporating Firebase for secure database management and authentication.
- Implemented a user-friendly interface displaying chat conversations between two users.
- Enhanced user experience by integrating an emoji picker for expressive communication.

EDUCATION

- Bachelor Of Technology (BTech) - Noorul Islam College of Engineering
- Internship - MERN Stack Development Duration: November 18, 2023 –December 12, 2023. Worked on MERN stack project, contributing to feature enhancements, and gaining hands-on experience in MongoDB, Express.js, React.js, and Node.js. Collaborated effectively, addressing coding challenges and refining components.
